TYPES OF BEARDS/MUSTACHES

- There are three key factors that will determine which beard or mustache style is best for you: 1. The shape and dimensions of your face. 2. The natural growth of your beard/ mustache. 3. The thickness of your beard/ mustache. 4. To do this, use your trimmer to trim your beard/ mustache weekly. For the best trimming results, your beard should be slightly damp (NOT WET) when using your trimmer. This will prevent the trim-mer from removing more hair than desired.
- Be careful not to use too much oil and don't trimmer off and wipe away the excess oil with a soft cloth.
5. After you finish using your trimmer, push down on the ON/OFF switch to turn the trimmer off.

GETTING STARTED:

- The dual blade cutting system is designed to neatly, quickly and evenly trim your beard, mustache, neckline and even close-cut stubble. While both blades are used for trimming, the upper blade can easily be removed, leaving the bottom blade for detailing thin lines and edging.

- cuchillas con dos cuchillas independientes. La cuchilla superior es una cuchilla de corte regular. La cuchilla inferior es una cuchilla de acabado que permite cortar el pelo de más cerca, reduciendo la cantidad de pasadas.
- BARBAS Y BIGOTES**
- El tipo de barba o de bigote que más conviene a una persona depende de:
1. La forma y el tamaño de su rostro.
2. La forma del crecimiento natural de su barba o de su bigote.
3. El espesor de su barba o de su bigote. Si no está seguro del tipo de barba o bigote que le conviene, pida consejo a un barbero. Después de dar forma a su barba o a su bigote, deberá mantener su aspecto, usando la cortadora una vez por semana. Para lograr resultados óptimos, humedadza ligeramente su barba antes de recortarla (no la moje). Esto evitará cortar demasiado pelo.

TIPOS DE BARBAS Y BIGOTES

- *Requiere 3 pilas AAA (no incluidas). Le aconsejamos que utilice pilas alcalinas, las cuales son más duraderas.

MANTENIMIENTO DE SU CORTADORA

- LUBRICACIÓN**
- Lubrique las cuchillas aproximadamente una vez al mes. Para no ensuciar, haga esto encima de un periódico. Sostenga el aparato al revés y enciéndalo. Coloque una gota de aceite sobre las cuchillas, espere por unos segundos, y luego apague el aparato y limpie el exceso de aceite con un paño suave.
- No use demasiado aceite y no lubrique el aparato más de lo necesario. Esto podría dañar el motor. Tampoco intente lubricar las piezas del motor, las cuales están lubricadas de por vida. Mantenga el aceite fuera del alcance de los niños.

LIMPIEZA DE LAS CUCHILLAS

Las cuchillas de su aparato fueron diseñadas con precisión para un uso específico, y deben recibir un cuidado muy especial. Limpie las cuchillas después de cada uso con el cepillo de limpieza provisto. Tenga cuidado cuando sea necesario cambiar o ajustar las cuchillas. Asegúrese de que ambas cuchillas siempre se cambien o afilen al mismo tiempo. Para disfrutar de su aparato durante mucho tiempo, utilícelo únicamente con el propósito para el cual fue diseñado: cortar la barba y el bigote.
